

To Dr. Racine:

To make a very long story short.... I have had leg pain, neck pain and shoulder pain for a long time. Six years to be exact.

My father was told he had fibromyalgia years ago, so I took it that I had fibromyalgia as well.

I kept getting worse. I would sometimes just cry and say I have to do something. My lower back was starting to hurt badly also. I have also said "I can not take another 5 years of this!" I have also said "I'd rather die, or kill myself rather than live this way." These are the things a human says usually – just too really express how bad they hurt. We don't necessarily mean.... We will kill ourselves.

I saw a television infomercial about you and your specialty. I had been praying hard that week about my condition. I was seeing a regular chiropractor then also. Nothing really was happening. I made an appointment with you. After 4 appointmentsI'm loving life again!

I can play with my kids; who before Dr. Racine's treatments.... I would be too tired for. I thank God for his grace and how he gives people the brains to learn, go to college and become specialists like you. You've really helped me live a normal life again. I thank you and your staff!

A Friend and Patient,

G. Hurst
